Revocation of an Athlete's Relève Level Identification

Failure to meet the commitment criteria may result in the athlete's status being revoked.

With some exceptions, in the event of injury, the athlete maintains his or her status on the condition that he or she has a plan to return to sport and agrees to follow the appropriate treatment prescribed by sports medicine specialists (sports medicine, physiotherapy, etc.).

Exceptional Circumstances

In the event of exceptional circumstances such that an athlete identified in the previous season is unable to take part in one or more of the activities provided for in the present identification policy (tournament, training camp), he or she may retain his or her status under certain parameters designed to verify that he or she remains committed to talent development.

In such a case, it is the responsibility of the athlete and his or her coach to complete the application form and submit it to Golf Québec. Official documents may be required by the Federation in order to analyze the request (e.g. medical bill from the attending physician, rehabilitation plan). Subsequently, any change in the athlete's situation must be forwarded to Golf Québec in writing. Ultimately, the decision taken by the committee responsible within the Federation must be ratified by the Ministry.
